

CRAZY COLOURS!

Colouring activity with mixing up colours.

Have ready few copies of a simple landscape drawing with each distinct area having a number from 0 – 10 (e.g. 0 for the cloud, 4 for the grass, 7 for the sky etc.) :

Then cut out small paper number circles and allocate number to each colour:

Take one copy of the landscape picture and colour it in using the correct number/colour combinations:

Then take the paper number circles, turn them around and mix them up, then put a new number to each colour in order in which they end up in your hand:

Then take new blank copy of the landscape picture and colour it in with the new number/colour combinations, see what new crazy colours for familiar objects will you end up with - blue sun?! orange grass?!

Have fun with crazy colours!!
